

Outreach ideas for Italy-Korea and Eating VLBI projects

Stefania Varano
Marcello Giroletti

Web site

Aims (internal)

- Exchange of scientific progresses/idea/informations/materials
- Organization of meetings and workshops and repository for proceedings and presentations

Web site

Aims (public)

- Diffusion of the project
- Communication of the main scientific results
- Repository for outreach (and educational?) materials

All materials for the public should be provided both in Italian and Korean, in order to be easily spread in the two countries, also to a general, non-expert, public.

Outreach and education

Cultural/social aspects of the project

- Fruitfulness of a worldwide cooperation (and wonders in some of its aspects, such as the observations schedules)
- Diversity and contact points of cultural backgrounds

The charm of the scientific contents

- Black holes!
- Creation or adaptation of educational materials

Multimedia for communication

Some ideas

- Video from existing materials
- Double interviews used for the «Festival dell'Oriente» in Bologna (Italy vs Korea: why and how did I chose astronomy?)

To be put on the website
